ICELAND CHALLENGE

eflow through ice and fire

Asia Film Premiere and next Screenings in Germany

In their short film titled *Iceland Challenge – eflow through ice and fire*, the Pedelec Adventures team shares the highlights of their spectacular one-month journey through Iceland on electric bikes. Four team members covered 4,000 kilometers on four bikes of the tour's main sponsor *eflow*.

At Taipei Cycle Show 2014 the Iceland Challenge short film will have its premiere in Asia. The next film screenings in Germany will take place at the bicycle events Rad + Outdoor in Bremen and VELOBerlin in Germany's capital city.

Taipei Cycle Show, Taiwan

Meet the Pedelec Adventures team in a live presentation with film screening:

March 5 and 6, 2014, 11:00 a.m. + 2:30 p.m.

Venue: Taipei Cycle Show, Nangang Exhibition Center, 4th floor, Fairly booth Mo519

Rad + Outdoor Bremen, Germany

March 8 and 9, 2014, 12:45 p.m. + 3:15 p.m.

Venue: Bicycle stage 2, hall 5, Messe Bremen, Findorffstraße 101, 28215 Bremen, Germany

VELOBerlin, Berlin, Germany

March 29, 2014, 4:15 p.m.

March 30, 2014, 3:30 p.m.

Venue: Messe Berlin, film stage

Review: Presentations at Fahrrad XXL Stores

The Fahrrad XXL Emporon stores in Chemnitz and Dresden, Germany, host bicycle related events once on a stage right inside the large bicycle shops. On February 19 and 20, 2014, Susanne Brüsche, head of Pedelec Adventures, gave a live slide show presentation about "Three spectacular pedelec trips through sand, grass and ice". Alongside with unique pictures from Moroccos Atlas mountains and Sahara desert, from Mongolia's wide steppe and steep mountains and from Iceland's northern beauty, the Iceland Challenge short film was a highlight of the 2 hour program.

PRESS RELEASE

ICELAND CHALLENGE

eflow through ice and fire

4,000 Kilometers Hardness Test

In the summer of 2013, the Pedelec Adventures team went on their third pioneer trip to show what's possible on electric bikes. For this journey, the adventurers chose Iceland – a country that has been shaped by ice and fire, wind and water, endless days in summer and endless nights in winter. Traveling between glaciers, hot springs and volcanos, the well-proven pedelec nomads Susanne Brusch and Ondra Veltrusky and their team members Uwe Schlemender and Andreas Gutmann faced the Nordic elements on speed-pedelecs provided by the main tour sponsor, *eflow*.

In urban Reykjavik, on remote gravel roads in the West Fjords and in the rough terrain of the highlands, the outdoor-fans challenged the all-round talent of the *eflow* bikes. Riding through Iceland's amazing countryside with wind and rain hitting their faces in 24 hours of daylight and temperatures between 0 and 15 degrees Celsius, the cyclists put to test the rear hub motor and the latest battery pack technology from co-sponsor HiTech Energy using high-performance Lithium battery cells from Samsung SDI.

After a month, the bikes and their electric propulsion system had survived a 4,000-kilometer real-life vibration test. "The bikes were most fun to ride on paved roads and smooth gravel surfaces at a pleasant traveling speed of up to 32 km/h" says project director and rider Susanne Brusch. "Thanks to the system's high torque we could easily climb up inclines of 17 percent even on bumpy ground." Although the *eflow* bikes are primarily designed for urban surroundings, with small modifications, they withstood all the rough terrains of the highlands that included several hundred kilometers through the Krepputunga lava desert and crossing snow fields and rivers, sometimes in heavy rain.

Charging the batteries at power outlets along the ring road, mostly at camp sites, was no problem. Traveling in a self-sufficient way in more remote areas, however, remained a challenge because solar panels were not efficient enough in Iceland's unstable weather. That's why the pedelec pioneers carried plenty of spare batteries and chargers, twelve in total.

PRESS RELEASE

The nature-lovers were most fascinated by the diverse Icelandic landscape from gigantic waterfalls, huge glaciers and snow-covered mountains, to black lava desert, green valleys and natural hot springs. All these spots and the sandy beaches and steep cliffs of the West Fjords made it more than worth trying to see most parts of the island.

Standing in the desolate 50 sqkm large Askja crater with its crystal clear lake, or next to the luminous-blue icebergs that float through the glacier lagoon of Jökulsárlón were unforgettable moments. As was scuba diving between the European and American continental plates, in ice cold water wearing dry suits and then cycling back to the dive site on our bikes – in full diver's gear.

“Instead of trading a pedelec for a horse ride like we did in Mongolia last year, we traded eflow for a flight.” remembers expedition manager and rider Ondra Veltrusky. “The pilot loved the ride just as much as we enjoyed the flight in a 4-person Russian Yak aircraft across the colorful mountains and volcanic landscapes of Landmannalaugar.”

About Pedelec Adventures

In 2011, journalist and electric bike expert Susanne Brüsche and expedition manager Ondra Veltrusky started the Pedelec Adventures project, focused towards developing travel concepts by combining adventures on pedelecs and e-bikes with inspiring destinations around the globe. The Berlin-based travel enthusiasts turn this concept into reality by taking off on multi-week excursions that function as both a product field test, as well as a way to inspire the electric bike world with exciting reports, presentations, unique photos and films.

By sharing their experiences and their own enthusiasm for the new bicycle species, the Pedelec Adventures team aims to promote electric mobility in a way that demonstrates the fun that can be had with these vehicles. After riding pedelec tours through Morocco and Mongolia, Iceland Challenge has been their third adventure. And there are more to come – stay tuned!

About eflow

The eflow brand name stands for elegant and sporty, high-performance electric bikes with an award winning design. eflow bikes are all-round talents, that are made for a fast and fun ride in a variety of surroundings including urban areas as well as nature trails. No matter if they are specified as a pedelec or throttle controlled e-bike, eflow has already made itself a name thanks to design awards and happy customers in the US, where the sporty cross-bikes are distributed through Currie Technologies.
